3	M/s Anondita Healthcare	M/s Raymond Consumer Care Ltd.

4. Points raised by representatives of prospective bidders were discussed. After due consideration of the queries, the remarks are enclosed.

**Annexure-1**

**Pre-bid queries raised by the prospective bidders & remarks by CMSS**

Sr. No.	As per tender	Tender clause no. & Pg no.	Bidder's Representation	Response
1	<b>For Schedule I: -</b> 100% quantity to be delivered between 90 days from the date	Annexure-I & Pg no. 39	Delivery completion within 60 days of PO is extremely tight since packaging material supply is under customer scope. We request you to issue	Kindly refer Annexure-2 of the Corrigendum.

	<p>of issue of LOA.</p> <p><b>For Schedule II: -</b> 100% quantity to be delivered between 60 days from the date of issue of Purchase Order.</p>		<p>the PO upon receipt of packaging material at our end from which delivery schedule to be given 90 days.</p> <p>Delivery schedule of Deluxe brand may please be amended as 120 days from LOA because lead time of foil and packaging material procurement will be minimum 30 days.</p> <p>The delivery periods may kindly be revised from 90 to 120 days in case of Deluxe Nirodh and 60 to 90 days in case of SMO Brands. Also, kindly mention specifically in your POs that the delivery period in case of SMO brand condoms should commence from the date of receipt of packaging material from the respective SMO, at our site.</p> <p>Delivery clause - 90 days needs to be increased to 120 days and 60 days needs to be increased to 90 days based on practical difficulties of manufacturing and supply chain management.</p> <p>Delivery Schedule : Quantity for this tender is double than last tender and you need to increase the delivery period from 90 days to 120 days considering the quantity. Kindly do the needful and support.</p> <p>SMO Brand Delivery: SMO Brand delivery period should be 90 days from the receipt of packing material.</p> <p>Kindly increase the duration of delivery schedule respectively 120 days and 60 days.</p>	
2	<p>If the supply reaches the designated consignee places or CMSS Warehouse after scheduled delivery date mentioned in LOA/P.O, liquidated damages will be levied @ 2.5% per week to be applied proportionately on per day basis up to a maximum of 10% of P.O. Cost, irrespective of the fact that whether the CMSS has suffered any damage/ loss or not, on account of delay in effecting supply. If the last scheduled delivery day happens to be a holiday the supply will be accepted on the next working day without any penalty.</p>	18.2 & Pg no. 34	<p>The specified LD charge of 2.5% is very high which will give a serious financial jolt for slight negligence, if anything happens, Hence request you to consider it sympathetically to reduce to 0.5% for which manufacturer's will be more encouraged.</p> <p>We once again request you to kindly consider and change the LD clause from 2.5% per week to 0.5% per week, as it always used to be earlier.</p> <p>For delayed payment beyond 60days – CMSS should self-impose a delay fine for payment beyond 60days – in line with LD clause of 2.5% - this will be a good example of governance.</p> <p>L.D. Charges: You have increased LD charges from 2.5% from the 0.5%, So please look into this and use the same terms as per last tender norms of 0.5% LC charges and support us.</p> <p>We hereby request to kindly charge the penalty on remaining quantity (Non Supply) of PO only.</p>	No changes.
3			P.O for Deluxe brand may please be issued in 2 parts as was earlier.	Kindly refer Annexure-2 of the Corrigendum.
4			Since as per the art work attached in the TED shows Type B packaging. Please confirm the SMO brand packaging type. If it is also Type B packing the point Type A packing type may please be removed from tender doc which is confusing since cost increase will be there in foil for Type B than Type A packaging.	<p><b>Clarified as: -</b></p> <p>Type B packaging for both Deluxe Nirodh and SMO brand condoms.</p>
5			Also please clear the condom specification in terms of width and length for both Deluxe and SMO brands.	Attached technical specification of Condom (Deluxe and

				SMO brand)
6			In order to achieve maximum participation and maximum utilization of the product, the Ministry of Health & FW had never imposed the clauses of EMD and Performance Security deposits in any Condom tenders in the past when the MoH used to procure directly. It was only after CMSS came into force and started the procurement on behalf of the Ministry that these clauses were added in the tender. Hence request, kindly review and consider to remove these conditions from the tender.	No changes.
7	Payments for supply will be made only after completion of supply of Items ordered in the individual Purchase Order PROVIDED quality reports are acceptable. The CMSS shall endeavour to make payment within 75 days in respect of items requiring sterility tests and within 60 days in respect of items requiring non- sterility test from the date of submission of invoice or from the date of receipt of material, whichever is later along with all the relevant documents of tender.	17.4 & Pg no. 32	<p>Payments, of all the consignments supplied, should be made strictly on time as per tender terms and conditions.</p> <p>Payment Terms for MSME - We kindly inform to you that we are small scale industry and it is very difficult for us to manage the funds because have received payment in 150 days after dispatch the goods we need to invest the huge money to procure all raw material, packaging everything in advance payment and it is very difficult for us to maintain our payment cycle for monthly expenses and other expenses. So, please consider the same and arrange the payments within 60 days after dispatching the goods as per your tender norms as we are MSME Companies and we need your support.</p>	<p><b>Clarified as: -</b></p> <p>Payments for supply will be made as per the tender terms &amp; conditions. However, best efforts would be made for making early payments to MSE bidders.</p>
8			We understand For SMO brands – PO to be issued after receipt of packaging material – it is a very good move – kindly document it.	Kindly refer Annexure-I of the tender document.
9			Please fix and decide in how many days laboratory results will be available after completion of pre deliver inspection. We need this accountability because otherwise a huge inventory needs to be maintained unnecessary during very long lab testing time.	As per tender terms & conditions.
10			PDI Date should be delivery Date - As per Tender requirements we are keeping ready stock for PDI but we are not getting the results within stipulated time and it is hammering our delivery period, So, we kindly request to you that please issue us the test results within 10/12 days after PDI or please accept PDI date is our delivery to avoid the L.D. issues because of delay in testing results.	Kindly adhere to tender terms & conditions.
11			Delivery Issues - After get the PO with Delivery destination from CMSS we are facing the delivery problems for many of the destinations because some destination not accepting the goods on time after get testing results and we need to take follow up for acceptance by concerned depot to deliver the goods which is also creating problems for delivering the goods within stipulated time.	Post tender issues to be raised at the appropriate stage.
12			Delivery Destinations: If possible please give us the nearest destination for supply to all suppliers as per their locations and support.	No changes.
13		Annexure-1A & Pg no. 41	Technical specification and packing artwork is given only DELUX NIRODH. SMO Technical specification and packing artwork is not given.	<p><b>Clarified as: -</b></p> <p>Technical specification of both Deluxe and SMO Condoms are same. SMO will provide the</p>

				secondary packaging materials of their respective brands.
14			<b>For Schedule III &amp; IV: -</b>  Penalty clause to be waived or supply time to be increased to 150 days. This is due to the time taking around 60 to 85 days to procure the packing materials. And manufacturing time required for 60 days after receiving the pkg materials	Kindly adhere to tender terms & conditions.
15			<b>Artwork for Schedule III &amp; IV: -</b>  Outer carton & Leaflet Artwork not available in tender document. Please provide complete artwork of Schedule III & IV	<b>Clarified as: -</b>  Attached artwork and leaflet for Mala-D. SMO will provide the secondary packaging materials of their respective brands
16	ii. SMO will provide secondary packing material at the manufacturing premises of supplier within 30 days of issuance of LOA. The purchase order shall be issued by CMSS only after getting confirmation from its suppliers/FWP regarding delivery of packing material by SMO at supplier's premises. The documentary proof (Receiving date of packing material as per stamped POD) shall be maintained by the supplier and SMO's to avoid any future disputes related to LD charges, shelf-life etc. In case of delay in issuance of PO due to delay in packing material by SMO, FWP would take further necessary action.	Annexure-I & Pg no. 40	We request you instruct CMSS to change the 30-day delivery clause to 75 days for providing packing material to Condom manufacturers at their premises. That way, SMO's can plan properly and will not be at risk of defaulting on any supply of packaging material timeline.	No changes.

**Note: - Above changes will be part of the tender document.**

**GM (Procurement)**

**Annexure-2**

**In addition to above, following changes are made in the published tender document: -**

<b>Sr. No.</b>	<b>Tender clause no. &amp; Pg no.</b>	<b>As per Tender</b>	<b>After amendment</b>
<b>1.</b>	Annexure-I & Pg no. 39	<b>For Schedule I: -</b> 100% quantity to be delivered between 90 days from the date of issue of LOA.  <b>For Schedule II: -</b> 100% quantity to be delivered between 60 days from the date of issue of Purchase Order.	<b>Amended as: -</b>  <b>For Schedule I: -</b> LOT 1: 50% quantity to be delivered between 90 days from the date of issue of LOA.  LOT 2: 50% quantity to be delivered between 120-180 days from the date of issue of LOA.  <b>For Schedule II: -</b> LOT 1: 50% quantity to be delivered between 60 days from the date of issue of Purchase Order.  LOT 2: 50% quantity to be delivered between 90-150 days from the date of issue of Purchase Order.

**Note: - Apart from above, all other terms & conditions of tender document will remain unchanged.**

**GM (Procurement)**

**Annexure-3**

**In addition to above, following changes are made in the published tender document: -**

**Revised CRITICAL DATE SHEET**

**GM (Procurement)**

**Specification of Latex Rubber Condom**

(As per Schedule R of Drugs and Cosmetics Rule 1945)

**SPECIFICATION FOR LATEX RUBBER CONDOMS**

**1. Dimensions:**

- i. Length: the length when unrolled (excluding teat) shall be not less than 170mm/180mm with width  $49\pm 2\text{mm}$ / $53\pm 2\text{mm}$  measured as per details in part 2 below.
- ii. Width: the width of a condom when laid flat and measured at any point within 85mm from the open end shall be;
  - a.  $49\pm 2\text{mm}$
  - b.  $53\pm 2\text{mm}$
- iii. Single wall thickness: the single wall thickness of a condom when measured at three points, one at  $30\pm 2\text{mm}$  from open end,  $30\pm 5\text{mm}$  from the closed end and excluding the reservoir tip and at the mid distance between these two points shall be from 0.045mm to 0.075mm.

**2. Freedom from Holes:**

Statistical sampling from quality control assessment of the finished product in respect of water leakage test shall be done in accordance with the plan set out in Appendix I. Condom shall show no evidence of water leakage when tested as follows:-

Unroll the condom and fit the open end on a suitable mount. The condom is thus suspended open end upwards. Fill it with 300ml water at room temperature and inspect it after a period of at least 1 minute for leakage upto 25mm from the open end. If, because of distension of the condom, the water does not extend to 25mm from the open end, raise the closed end until water level reaches the distance. After at least 1 minute, inspect the newly-wetted part of the condom for leakage.

Note: Air leakage test is deleted from requirements.

**3. Bursting Volume and Pressure Test:**

Sample condoms shall be tested for bursting volume and pressure test. Statistical sampling for this test shall be done in accordance with the plan set out in Appendix-II.

Condom shall not leak or burst at a volume of less than that specified or pressure less than 1.0k pa(gauge), when test as in Appendix-IIA both before and after oven

conditioning as specified in Appendix-III. Bursting volume minimum limit in litres shall be equal to

$$= \frac{(\text{Mean condom width in mm})^2}{151.8} \text{ rounded to the nearest 0.5 litres.}$$

**Note:** Tensile test is deleted from requirements.

#### **4. Integrity of Individual Package Seals:**

Sample condoms in individual packages shall be placed in a sealed, transparent container (such as laboratory bell jar) and subjected to a vacuum of  $50 \pm 10$  kpa (gauge) for a period of one minute.

Condom packages that do not inflate and remain inflated for the period of the test shall be deemed non-compliers. In doubtful cases, the test may be repeated and both the inflation and deflation of packages may be observed on application and removal of vacuum.

An AQL of 2.5 will be applied in assessing the results of this test. 50 samples of condoms shall be tested for integrity test of individual package seals. The compliance limit or acceptance number shall be not more than 3 condoms.

**INSTRUCTION LEAFLET FOR MALA D**

1. What is MALA D?

MALA D is a contraceptive pill. This pill is an easy safe effective and reversible contraceptive for women wanting to delay first pregnancy or space the next child. It is the method of choice for postponing the first pregnancy. MALA D is available in packets containing a month's supply. Each packet has 28 tablets. The first 21 tablets are white in colour and contain hormones which prevent pregnancy. The remaining 7 tablets are coloured and do not contain hormones. However, these should also be taken to maintain consistency.

2. How does it work?

The pill works by suppressing the release of the ovum (egg cell) from the ovaries.

3. Can I take the pill?

The pill is a safe method of contraception.

4. Where to get the pill?

The pill is available free of charge at Mala D or all Health and Family Welfare Centres and Govt. Hospitals. It is also sold at all medical shops and social marketing outlets by the name Mala-D. The pill is prescribed by a Doctor after examination or by a trained nurse/assistant with the help of a check list. If you get the pill from the ANM/Market outlets please consult a doctor within three months of the use of this pill.

5. When to start the pill?

(i) Start taking Mala-D from the 5th day of the menstrual period (counting the day of bleeding as day No. 1). Begin with the first pill marked 'start'.

(ii) Continue taking one pill a day along the direction indicated by the arrow mark. Develop the habit of taking pill at a particular time of the day preferably either after dinner or before going to bed. After taking the white pill one each for 21 days, take one color pill a day for the next seven days.

(iii) You will have regular menstruation while taking the color pill. Do not stop taking even if you have the period.

(iv) When the color pills are exhausted continue taking pills from a new packet as instructed above. Even if you are having periods or did not get periods, start the new pack the very next day after taking the last color pill.

(v) If you want to conceive stop using Mala-D.

(vi) Keep an extra pack of the pill handy so that the last pill can be taken without a break. Regularity and continuity in taking the pill is essential to prevent pregnancy.

6. If the pill is missed

If you miss a pill on a particular night the missed tablet should be taken the next day as soon as you remember. Take another pill that night, as usual. In other words, on the day following a missed pill day, two pills would have to be taken. If you have missed the pill on two three occasions, continue pill taking but use another contraceptive method like condoms till the next cycle starts.

7. Health benefits

The pill bestows freedom upon the married women to control her own fertility and choose motherhood when she desires. In addition to preventing pregnancy, it has beneficial effect on the following:

- Eases pain during menstruation
- Reduces excessive bleeding during menstruation
- Provides some protection against pelvic infection
- Protects against cancer of ovary and endometrium
- Protects against benign breast tumours and ovarian cyst

8. What are the side effects?

You may have some discomfort such as tenderness of breasts, headache or nausea in the first one or two months. But these symptoms disappear very soon.

In some women the long term use of Oral Pill may lead to increased risk of high blood pressure, heart attack & various thrombosis.

9(a) Do not take oral pill if you have any of the following:

- Suspected confirmed pregnancy
- Regular unexplained vaginal bleeding
- Breast first infant less than 5 months of age

(b) Contraindications:

- Hepatic (Liver) disease (Anti-hepatitis treatment)
- Heart disease/Venous thromboembolism (DVT, PE, Diabetes)
- Liver/Gall bladder disease or jaundice during pregnancy/last six months
- Suspected confirmed cancer in any organ

10. Please consult a doctor before starting the pill if you:

- are a smoker
- have migraine
- have epilepsy
- have severe skin allergy or asthma
- are 40 years of age especially if you are regular smoker or have used the pill continuously for over 5 years

Women with these problems may use oral pills under careful supervision if other contraceptive are found unsuitable.

11. When to consult a doctor if using a pill.

After initial medical check up please consult a doctor every 12 months. In addition consult a doctor if:

- you do not get period in two consecutive cycles while taking the pill
- you feel any signs of pregnancy
- you feel any signs of infection
- you feel any signs of infection
- you feel any signs of infection

12. After initial medical check up please consult a doctor every 12 months. In addition consult a doctor if:

• you do not get period in two consecutive cycles while taking the pill

• you feel any signs of pregnancy

• you feel any signs of infection

• you feel any signs of infection

• you feel any signs of infection
